A USER'S GUIDE TO "FOCAL" FOR THE 4502

"FOCAL" IS A REGISTERED TRADEMARK OF DIGITAL EQUIPMENT CORPORATION

COPYRIGHT 1977 THE DENVER 6502 USER'S GROUP

DISTRIBUTED BY: THE 6502 PROGRAM EXCHANGE 2920 WEST MOANA LANE REND, NEVADA 89509

***** FOCAL-65 PROGRAMMING LAMBUAGE *****

***** FORMULATING ON-LINE CALCULATIONS IN ALGEBRAIC LANGUAGE *****

"FOCAL" IS THE NAME GIVEN TO A HIGH-LEVEL MATHEMATICAL LANGUAGE INTERPRETER ORIGINALLY CONCEIVED FOR THE DIGITAL EQUIPMENT CORPORATION PDP-8 SERIES OF MINI-COMPUTERS. "FOCAL" HAS MISTORICALLY BEEN A LANGUAGE FOR BEBINNERS (A LA 'BASIC') AND A LANGUAGE USED BY THE EXPERIENCED HACKER. THIS MANUAL DESCRIBES "FOCAL" AS IT EXISTS ON THE 6502 MICROPROCESSOR.

THIS USER'S BUIDE IS PRESENTED IN A "LET'S TAKE A GUIDED TOUR OF FOCAL" FORMAT. READERS ARE ENCOURAGED TO PROVIDE CONSTRUCTIVE FEED-BACK CONCERNING THIS MANUAL, WHICH WAS PRODUCED USING "FOCAL" ON A 6302 MICROPROCESSOR

TABLE OF CONTENTS

"TYPE" COMMAND, IMMEDIATE NUMERICAL AND STRING OUTPUT	1	
"SET" COMMAND, VARIABLES, SUBSCRIPTS	8	
FORMATTING OUTPUT FOR "TYPE", MULTIPLE-STATEMENT LINES	17	
PROGRAM STRUCTURE: GROUPS AND STEPS, "WRITE," "GOTO" AND "ERASE" COMMANDS	22	
EDITING PROGRAMS, "MODIFY" COMMAND	27	
DATA INPUT: "ASK" COMMAND, FORMATTING, ERRORS	30	
PROGRAM CONTROL: "IF" COMMAND	35	
CALLING GROUPS WITH "DO" COMMAND; "QUIT" AND "RETURN"; "ON"	44	
LOOPS: "IF" STRUCTURES, "FOR" COMMAND	58	
FUNCTIONS: ABSOLUTE VALUE, TAKE INTEGER, RANDOM VALUE	66	
FUNCTIONS: ASCII CHARACTER INPUT AND OUTPUT	71	
FUNCTIONS: DIRECTED INPUT AND OUTPUT	74	
STRINGS: LITERALS, FUNCTIONS, I/O, STRINGS AS DEVICES	78	
FUNCTIONS: USER-DEFINED SUBROUTINES, SOFTWARE INTERRUPT	93	
FUNCTIONS: CONSOLE ECHO, CURSOR CONTROL, MEMORY EXAMINE/DEPOSIT	100	
APPENDIX A: ERROR CODES	101	
APPENDIX B: TRIGONOMETRY/MATHEMATICAL SUBROUTINES	102	
APPENDIX C: MODIFYING AND AUGMENTING FOCAL-65	103	

COMMANDS AND FUNCTIONS

A	3.07	R V B WHENNY V.	
A	ask	A X A "TEXT", X;

FECH	CONSOLE ECHO CTRL	FPIC	INTERRUPT SERVICE
FIDV	SET INPUT DEVICE	FODV	SET OUTPUT DEVICE
FISL	SET STRING LENGTH	FSLK	COMPARE STRINGS
FSTI	READ CHARS. FROM INPUT	FST0	SEND STRING TO OUTPUT
FINI	INITIALIZE INPUT DEVICE	FINO	INITIALIZE OUTPUT DEVICE
FCON	SET CONSOLE	FCUR	SET CURSOR

```
FOGAL MUST BE GIVEN 'GOMMANDS' IN ORDER TO ACTUALLY ACCOMPLISH
OF SCMETHING USEFUL TO TME USER. THESE COMMANDS INSTRUCT FOCAL TO
C SCHETCHING USEFUL TO TME USER. THESE COMMANDS INSTRUCT FOCAL TO
C PEFFORM A SPECIFIC OPERATION OR SERIES OF OPERATIONS. THE FOCAL
C CSYSTEM", WHICH RESIDES IN THE COMPUTER'S MEMORY. MAS BEEN
C DESIGNED TO UNDERSTAND A SPECIFIC SET OF COMMANDS. ANY COMMAND
C THAT 17 HAS DESIGNED TO RECOGNIZE. IF YOU TRY TO GIVE
C FOCAL OTHER COMMANDS, IT WILL NOT KNOW HOM TO INTERPRET THEM.

C ONE OF THE MOST USEFUL COMMANDS IS THE 'TYPE' COMMAND, THE
C 'TYPE' COMMAND ALLOWS TME USER TO GIVE FOCAL AN ARITHMETIC
C EXPRESSION, MAVE FOCAL EVALUATE IT, AND TYPE THE RESULTANT VALUE
C COMMAND BY TYPING 'TYPE 1+1, AND THEN STRIKING THE 'CARRIAGE RETURN'
C KEY ON HIS KEYBOARD, THIS KEY IS SOMETIMES LABELED AS
C 'RETURN', FOCAL DOES NOTHING WITH THE COMMAND UNTIL THE 'RETURN'
C KEY ON HIS KEYBOARD, THIS KEY IS SOMETIMES LABELED AS
C KEY IS STRUCK, AT THAT POINT, FOCAL THEN TRIES TO INTERPRET THE
C COMMAND BY TYPING 'THEN DOES THE TYPE THEN TRIES TO INTERPRET THE
C COMMAND BOOK OF THOSE THAT IT HAS BEEN DESIGNED TO RECOGNIZE
C (SUCH AS 'TYPE') AND THEN DOES THE APPROPRIATE THING THAT THE
C COMMAND INDICATES TO DO. IN THIS CASE, FOCAL HAS TOLD TO EVALUATE
C THE ARITHMETIC EXPRESSION 'E-1' AND TYPE THE RESULTANT VALUE TO
C THE OUTPUT DEVICE, IT DID THIS, SINCE THE VALUE '2,800' APPEARED
CO N THE OUTPUT DEVICE, IT DID THIS, SINCE THE VALUE '1' CHARACTER, WHICH
C IS A PROMPT, TELLING THE USER THAT IT HAS NEW COMMAND. A 'BLANK'
C (SPACE BAR) MUST ALWAYS FOLLOW AS '1'+PE') FROM THE REST
C OF THE INFORMATION ON THE LINE (SUCH AS '1'+PE') PROM THE REST
C OF THE INFORMATION ON THE LINE (SUCH AS '1'+PE') PROM THE REST
C OF THE INFORMATION ON THE LINE (SUCH AS '1'+PE'). HOMEVER, THE COMMAND
C C HANCE GOMEN IT IS, SOME MORE EXAMPLES FOLLOW!
```

```
*C AS YOU CAN SEE, IF 1 JUST STRIKE THE 'RETURN' KEY, WITHOUT *C TYPING A COMMAND OF SOME KIND, THEN FOCAL HAS NOTHING TO DO, ANC *C SIMPLY PROMPTS AGAIN WITH THE '*'. SOME MORE EXAMPLES OF THE *C 'TYPE' COMMAND:
  +T 12.5+3.2
          15.7000
  ·7 10-7.5
               2.520
           12.222+
  et 3/4
               2.750+
  +T 2+2+2
              6.000+
  eT 2+3
              8.000*
AS YOU CAN SEE, SEVERAL DIFFERENT ARITHMETIC OPERATIONS CAN BE COMMENDED BY FOCAL. THESE ARE ADDITION, SUBTRACTION, DIVISION, MULTION COMMENDED BY FOCAL. THESE ARE ADDITION, SUBTRACTION, DIVISION, MULTION COMMENTATION, AND EXPONENTIATION (RAISING TO A POWER). THESE OPERATIONS OF ARE INDICATED BY THE BYMBOLS + , -, /, -, +, RESPECTIVELY.

COMMENT THESE OPERATIONS ARE MIXED WITHIN A GIVEN EXPRESSION, THERE BY IS A HIGHARCHY RULE HHICH FOCAL USES TO DETERMINE THE ORDER IN WHICH CITY IS TO PERFORM THE OPERATIONS, FOCAL WILL PERFORM ANY EXPONENTIATION COMMENTS. THEN ANY BUSINESS OF THEM ANY SUBTRACTION (-), AND FINALLY ANY ADDITIONS (*). SOME EXAMPLES OF LILUSTRATING THIS RULE POLLOW!
 #T 1+3+4
          13.2680
 PT 2-3/4
             1.250*
 e7 3-2
             1.000-
 ef 2-3
           -1.080-

 oT 24/3=4
             2.300+
```

```
THE USER MAY INDICATE THAT A CERTAIN GROUP OF OPERATIONS IS

C TO BE PERFORMED FIRST, HE DOES THIS BY ENCLOSING THAT GROUP OF

C OPERATIONS MITHIN PARENTHESES, THERE MAY BE MORE GROUPS ENCLOSED

C NITH PARENTHESES WHICH ARE CONTAINED HITHIN A GROUP ALREADY ENCLOSED

C NITHIN PARENTHESES, IN THIS CASE, FOCAL HILL PERFORM THE

C OPERATIONS WITHIN THE MOST DEEPLY HESTED (INNERMOST) PARENTHESES

C FIRST, THEN THOSE IN THE NEXT OUTER, AND SO ON, UNTIL THOSE AT THE

COUTERMOST LEVEL ARE DONE LAST. HERE ARE SOME EXAMPLES TO CLARIFY

C THIS RULE!
 OC THIS RULE!
#T 1+1

  THE ANSWER 18
                                                    4.000.
  T "FIRST ANSHER IS", 3-2," SECOND ANSHER IS", 5/2-1
FIRST ANSHER IS 1.800 SECOND ANSHER IS 3,900+
AS YOU CAN SEE, THIS CAPABILITY ALLONS DUTPUT FROM THE
C COMPUTER TO BE MADE MORE LEGISLE. SOMETIMES IT IS
C DESIRABLE TO MAVE CONTROL OVER THE LINE SPACING ON THE OUTPUT
C DEVICE, IN ORDER TO MAKE THE OUTPUT APPEAR MORE LEGISLE, THERE
C ARE SPECIAL FORMAT CONTROL CHARACTERS WHICH FOCAL RECOGNIZES WHEN
C THEY APPEAR IN A 'TYPE' STATEMENT MHICH ALLOW THE USER TO DO THIS
C KIND OF FORMATING, ONE SUCH CHARACTER IS THE EXCLAMATION MAKE (!).
C MHEN FOCAL ENCOUNTERS THIS CHARACTER IN A 'TYPE' STATEMENT, IT CUTPUTS
C A CARRIAGE RETURN CHARACTER, FOLLOWED BY A LINE FEED CHARACTER, TO
C THE OUTPUT DEVICE. THIS CAUSES A RETURN TO THE BEGINNING OF THE
C CURRENT LINE, AND AN ADVANCING TO THE NEXT LINE ON THE OUTPUT
C DEVICE. THE POUNDS CHARACTER (#2), WHEN ENCOUNTERED IN A 'TYPE'
C STATEMENT, CAUSES A CARRIAGE RETURN CHARACTER TO BE OUTPUT, BUT
C THAT'S ALL. THE EFFECT IS THAT THE CARRIAGE IS RETURNED
C SUT THE LINE IS NOT ADVANCED, HENCE, ANY FURTHER OUTPUT, SOME
C ON THE SAME LINE, POSSIBLY OVERPRINTING EXISTING OUTPUT. SOME
C EXAMPLES FOLLOW:

   MT 11.9
                                           Х
                                                                        Y",1,2+3,4/5,11
                                           0.800
              5.000
```

```
THIS CAPABILITY ALLOWS FOR MAKING VERY READABLE OUTPUT.
  +C
  ⊕Ĉ.
SOMETIMES IT IS USEFUL TO HAVE FOCAL REMEMBER THE RESULT OF AN CARITHMETIC CALCULATION. THIS RESULT MAY THEN BE USED LATER INSTEAD OF HAVING TO RE-DO THE CALCULATION OVER AGAIN. THIS CAPABILITY IS CACOMPLISHED THROUGH THE USE OF 'VARIBLE NAMES!. A NAME OF ACCOMPLISHED THROUGH THE USE OF 'VARIBLE NAMES!. A NAME OF AMY BE ATTACHED TO THE RESULT, OR PARTIAL RESULT, OF AN ARITHMETIC OF CALCULATION. IF THE NAME IS USED LATER IN SOME OTHER CALCULATION.

CONTROL THE VALUE ASSOCIATED HITH THAT NAME IS SUBSTITUTED IN PLACE OF CHEN NAME, IN FOCAL, A VARIABLE NAME MUST BEGIN WITH A LETTER OF CHEN NAME, IN FOCAL, A VARIABLE NAME MUST BEGIN WITH A LETTER OF CHEN ALPHADET (A-Z), BUT MAY NOT BEGIN WITH THE LETTER 'F' (THIS LETTER OF CHAVE AN OPTIONAL SECOND CHARACTER, MHICH MUST BE A DIGIT IN THE RANGE OF B-7. WHEN THE OPTIONAL DIGIT IS OMITTED, THEN '6' IS

CONCRETED AS THE DIGIT. THUS: 'AS', 'BT', 'C', 'E2', AND 'R' ARE COLD NAMES AS THE DIGIT. THUS: 'AS', 'BT', 'C', 'E2', AND 'R' ARE COLD NAMES FOR VARIABLE QUANTITIES, THE TERM 'VARIABLE' IS USED, GECAUSE, CONTROL AT THE TIME, THE SAME NAME MAY BE ASSOCIATED HITH A NEW CUANTITY.

CONTROL AT THE TIME, THE SAME NAME MAY BE ASSOCIATED HITH A NEW CUANTITY.

CONTROL AT THE THE THE SAME NAME MAY BE ASSOCIATED HITH A NEW CUANTITY.

VARIABLE NAMES (SUCH AS "A1", "X", "Y", "2", "A") CAN HAVE "SUBSCRIPTS"

C ASSOCIATED WITH THEM. A SUBSCRIPT IS ESSENTIALLY AN TITEM OR "ELEMENT"

C NUMBER WHICH MAY FURTHER DEFINE THE VARIABLE. FUCAL SUBSCRIPTS ARE

C ROLGHLY ANALOGOUS TO THE MATHEMATICAL SUBSCRIPTS LSED IN ALGEBRA. IT

C IS USEFUL, SOMETIMES, TO DEAL HITH SPECIFIC TIEMS OF A GIVEN NAME.

C FOR INSTANCE, IF THE NAME "C" REPRESENTED THE CHAIRS IN A ROOM, THEN

C 'C(2)" ("C" SUBSCRIPT '9") HIGHT REPRESENT THE PEROTH CHAIR IN THE ROOM.

C (COMPUTER PROGRAMMERS SOMETIMES COUNT $,1,2,... INSTEAD OF 1,2,3).

C 'C(1)' MIGHT REPRESENT THE NEXT, 'G(2)' MIGHT REPRESENT THE

C NEXT, AND 'C(N)' MIGHT REPRESENT THE 'NTH' CHAIR, IF THERE HERE AT

C LEAST 'N' CHAIRS IN THE ROOM, SUBSCRIPTS IN FOCAL MAY BE ANY

C VALUE IN THE RANGE OF -32767 TO *32767, SOME EXAMPLES SHOULD HELP

C TO CLARIFY SUBSCRIPTS:
 OC TO CLARIFY SUBSCRIPTS:
#$ X(1)#5
 #7 X(1) . 1
             9.688
 #T X<sub>2</sub>1
             0.000
TO NOTE THAT X, AND X(1) ARE DIFFERENT!. IN FACT, IF A SUBSCRIPT IS TO OMITTED, THE VALUE OF \theta is assumed. Thus X and X(\theta) are one and The Same, more examples:
 et x(@), !
             8.000
 #$ X=X+1
 *T X,X(Ø),E
             9.000

*T %5.03,X.1
OC IT IS NOT NECESSARY FOR THE VALUE FOLLOWING THE 'N' TO BE A CONSTANT OC (SUCH AS '5,83'); BUT CAN BE ANY ARITHMETIC EXPRESSION. FOCAL OC WILL EVALUATE THE EXPRESSION, REDUCE IT TO A NUMBER OF THE FORM OC '88, AA' AND USE THAT VALUE AS THE FORMAT SPECIFIER. SOME EXAMPLES:
•$ X=3.02
4T X,!
3.025
oc current output format is still '5.63' FROM ABOVE.
*T 1+1,1
      2.088
*T_$X.1*1.1
OF THE BUTPUT FORMAT IS NOW 'STEET'S BECAUSE THAT IS THE VALUE OF "XT.
SC HORE EXAMPLES:
+S X=X+1
47 XX.1+1.1
    2.00
```

```
LET'S NOW LOOK AT AN IMPORTANT FEATURE OF FOCAL. THE TYPE:

"C AND "SET" COMMANDS ALLOW THE JSER TO DO SOME USEFUL THINGS. THE

"C USER MAY NEED TO DO A SEGUENCE OF "TYPE! AND "SET" COMMANDS IN CADER

"C COMMAND PER LINE BY SEPARATING EAGH COMMAND WITH A ";" (SEMI~COLON).

"S SOME EXAMPLES:

"S XR5, Y#6, 2#7; T X, Y, Z, !

"S .000 6.000 7.000

"T S

X3( 0) = 5.000

6.000

7.000

*S Z=X+Y; T Z, !!S Z=Z+1; T X, Y, Z; !

11.000

5.300 6.000 12.000
```

```
ONE OF THE MOST USEFUL FEATURES OF ANY COMPUTER LANGUAGE IS THE C ABILITY TO STORE A SERIES OF COMMANDS FOR LATER EXECUTION. THE C COMPUTER IS VERY GOOD AT EXECUTING A SEQUENCE OF INSTRUCTIONS (COMMANDS) OVER AND OVER AGAIN. THE USER MAY STORE A LINE OF POCAL COMMANDS. C AMAY FOR LATER EXECUTION. THIS IS DONE BY TYPING A 'LINE MUMBER' OF BEFORE THE ACTUAL LINE OF COMMANDS. WHEN THE CARRIAGE RETURN IS C STRUCK. THE LINE HILL BE STORED BY FOGAL, BUT THE COMMANDS ON THE C LINE WILL NOT BE EXECUTED (AS OPPOSED TO IMMEDIATE EXECUTION IF THE C LINE WILL NOT BE EXECUTED (AS OPPOSED TO IMMEDIATE EXECUTION IF THE C LINE WILL NOT BE EXECUTED (AS OPPOSED TO IMMEDIATE EXECUTION IF THE C THO PARTS, AND HAVE THE FORM 'GG.SS', WHERE 'GG' (#1-99) IS THE C THE 'GROUP' THAT THIS LINE BELONGS TO, AND 'SS' (#1-99) IS THE C STEP! WITHIN THE 'GROUP', WE WILL SEE THE SIGNIFICANCE OF SELFO C ABLE TO 'GROUP', LINES TOGETHER AND REFER TO THEM AS A UNIT. THUS A C ILINE NUMBER' OF '2,39' INDICATES THAT THIS LINE IS 'STEP' NUMBER 35 C IN 'CROUP' 2. NOTE THAT '2,2' FOR A LINE NUMBER MEANS THAT THIS LINE AC IS STEP THENTY IN GROUP THO, AND NOT STEP TWO, TRUET'S MOULD BE C EXAMPLES ARE IN ORDER RERE:
  *1.1 T "MELLO: THERE":::$ X=1,Y=2,Z=3
*1.2 T "THE VALUES O" X: Y; 2; ARE ":X:Y,Z;
  #2.1 T "THAT'S ALL FOLKS",!
OF THE USER GEOMETRIC COMPANDS ON THESE LINES HERE NOT EXECUTED. BUT THE COMPANDS ON THESE LINES HERE NOT EXECUTED. BUT THE CLINES HERE STORED AND STORED LINE IS ENTERED (OR CHANGED), THE CUSER'S VARIABLE NAMES AND THEIR VALUES ARE ERASED FROM THE COMPUTER'S CUSER'S VARIABLE NAMES AND THEIR VALUES ARE ERASED FROM THE COMPUTER'S CUSER'S VARIABLE NAMES AND THEIR VALUES ARE BRISED FROM THE COMPUTER'S CUSER'S VARIABLE NAMES AND THEIR VALUES ARE BRISED FROM THE COMPUTER'S CUSER'S VARIABLE THEY ALLOW MANIPULATION OF STORED LINES. HE WILL COMPANDS THE USER TO WRITE COMPANDS TO THE USER TO WRITE OUT THE LINES (ALL OR SOME) THAT FOCAL HAS STORED. EXAMPLES
 AMRITE
     C FOCAL-65 (V30) 18-JUL-77
     1.10 T "HELLO, THERE": 118 X01, Y02, 243
    1.20 T "THE VALUES OF X, Y, Z, ARE ", X, Y, Z, I
    2.10 T "THAT'S ALL FOLKS";1
量例
    G FOCAL=69 (V3D) 18-JUL=77
    1.10 T "HELLO, THERE"!! JS X=1,Y=2.2=3
    1.20 T "THE VALUES OF X, Y, Z, ARE ",X,Y,Z,:
    2.10 T "THAT'S ALL FOLKS", [
```

```
F NO PARAMETER FOLLOWS THE 'N' OR 'HRITE' COMMAND, THEN ALL LINES OF WHICH FOCAL HAS STORED AWAY WILL BE WRITTEN TO THE OUTPUT DEVICE.

ALSO WHENEVER FOCAL HAITES 'ALL' THE LINES, IT WRITES THE TOP LINE OF MHICH IS AN IDENTIFIER TELLING WHICH VERSION OF THE FOCAL SYSTEM OF THIS IS, AND THE DATE WHICH IT WAS CREATED. IF A SPECIFIC LINE OF NUMBER FOLLOWS THE 'M' OR 'WRITE' COMMAND, THEN ONLY THAT LINE OF IS WRITTEN TO THE OUTPUT DEVICE. EXAMPLE:
BN 1.2
 1.28 T "THE VALUES OF X, Y, E, ARE ".X,Y,E,!
♦₩ 2.1
 2.18 T "THAT'S ALL FOLKS" !!
ek 1.1
  1.10 T "HELLO, THERE": 135 Xe1; Ye2, 283
ed 2.11W 1.2|W 1.1
  2.10 T "THAT'S ALL FOLKS".:
  1.28 T "THE VALUES OF X. Y. E. ARE ",X,Y,E,T
  1.10 Y "HELLO, THERE"!! IS X41.Y42.283
 eT !. "HERE ARE MY STORED LINES". 11:W
 HERE ARE MY STORED LINES
   C FOCAL=65 (V3D) 18-JHL=77
   1.18 T "HELLO, THERE": 118 Xeliye2.283
1.28 T "THE VALUES OF X, Y, E, ARE ",R,Y,Z,f
   2.18 T "THAT'S ALL FOLKETIS
 THE USEFULNESS OF "GROUPS! OF LINES WILL NOW BECOME APPARENT.

C IF THE USER SPECIFIES ONLY A GROUP NUMBER WITHOUT A LINE NUMBER

C (LINE NUMBER OF ZERO), THEN THE "WRITE" COMMAND WRITES OUT ALL LINES

C WHICH BELONG TO THE SPECIFIED GROUP. "EXAMPLET
 WHRITE 1
   1.10 T "HELLO, THERE"::15 X#1,Y#2.283
1.20 T "THE VALUES OF X, Y, Z, ARE ",X,Y,Z,1
  *H 2
   2,18 T "THAT'S ALL FOLKS".1
```

```
THIS ALLOWS THE USER TO LIST ANY LINE, GROUP, OR THE ENTIRE
OF PROGRAM. A 'PROGRAM' IS A SERIES OF STORED LINES WHICH PERFORM SOME
OF FUNCTION OR TASK FOR THE USER. WELL, WE HAVE CAREFULLY TYPED IN THE
OF PERFORM THE COMMANDS THAT HAVE BEEN STORED AWAYS WE CAN INDICATE THAT
OF PERFORM THE COMMANDS THAT HAVE BEEN STORED AWAYS WE CAN INDICATE THAT
OF FOCAL TRANSFER CONTROL (BEGIN EXECUTING STATEMENTS) TO ANY SPECIFIC
OF LINE BY THE USE OF THE 'GOTO' (ABBRIEVIATED 'G' OR 'GO') COMMAND.
OF THE 'GOTO' COMMAND MUST BE FOLLDWED WITH THE LINE NUMBER OF
OF THE STORED LINE THAT HE WANT TO TRANSFER CONTROL TO, IF A LINE NUMBER
OF LINE THAT HAS BEEN STORED AWAY. SOME EXAMPLES:
    C FOCAL=65 (V30) 18-J_L=79
   1.10 T "HELLO, THERE": 118 Xe1, Ye2, 283
1.20 T "THE VALUES OF X, Y, Z, ARE ", X, Y, Z, T
   2.10 T "THAT'S ALL FOLKS",1
 #G0T0 1.1
 HELLO. THERE
 THE VALUES OF X, Y, E, ARE
                                                                                     1,000
                                                                                                             2.668
                                                                                                                                      3,500
 THAT'S ALL FOLKS
NOTE THAT CONTROL PASSES TO THE NEXT LINE IN SEQUENCE (UNLESS FOCAL OF HAS BEEN TOLD OTHERWISE) UNYIL ALL LINES HAVE BEEN EXECUTED. FOCAL OF THEM HAS NOTHING MORE TO OD; SO IT PROMPTS WITH A '4'. AND AMAITS A DO NEW COMMAND FROM THE USER. MORE EXAMPLEST

TWHAT IF A MISTAKE IS FOUND INSIDE OF A LINE ALREADY STORED AWAY?",

OF ONE APPROACH WOULD BE TO SIMPLY TYPE THE WHOLE LINE IN OVER AGAIN (FOCAL

OF WILL REPLACE THE ONE STORED WITH THE NEW LINE). BUT THIS PROCESS CAN

OF BE VERY TEDIOUS IF ONLY ONE CHARACTER IS TO BE CHANGED IN A LONG LINE.

**C FOCAL PROVIDES A PACILITY WITH THE 'HODIFY' COMMAND TO ALLOW THE CUSER TO MAKE CHANGES IN A STORED LINE WITHOUT HAVING TO RE-TYPE THE CENTIRE LINE. IF THE USER TYPES THE 'HODIFY' COMMAND ('M'), FOLIDHED OF BY A SPECIFIC LINE NUMBER, THAT LINE IS OPENED FOR MODIFICATION, FOCAL TYPES OUT THE LINE NUMBER (IMPORMING THE USER THAT IT LOCATED THE LINE), OF THEN MAITS FOR USER IMPUT. MHENEVER THE MODIFY COMMAND IS WATTING FOR USER IMPUT, THE USER MAS SEVERAL MODIFICATION OPTIONS, THEY ARE:

- 1. SIMPLY TYPE IN ANY TEXT THAT THE USER MANTS INSERTED AT THAT POINT.
- 2. DELETE ANY TEXT TO THE LEFT BY THE USE OF THE TRUBDUTY AND/OR ISAGKARROW! MEYS.
- 3. SEARCH FOR (POSITION AFTER) A CHARACTER FURTHER TO THE RIGHT OF THE JSER'S CURRENT POSITION ON THE LINE. THIS IS DONE BY STRIKING THE 'ALTHOOR' KEY (SOMETIMES LABELED 'ESCAPE'); FOLLOWED BY STRIKING THE CHARACTER THAT IS TO BE SEARCHED FOR, IF THE CHARACTER IS LOCATED, THE LINE IS TYPED OUT UP TO THAT POINT AND FOCAL MAITS FOR FURTHER USER INPUT. IF THE CHARACTER IS NOT LOCATED, THE ENTIRE REST OF THE LINE IS TYPED, AND MODIFICATION ENDS.
- 4. THE USER MAY TRUNCATE A LINE (REMOVE ALL INFORMATION TO THE HIGHT)
 BY TYPING THE CARRIAGE RETURN REY, AT THIS POINT HODIFICATION ENDS.
- 5. THE USER MAY END MODIFICATION BY STRIKING THE TIME FEEDT KEY.
 THIS CAUSES THE REMAINDER OF THE LINE TO BE TYPED. AND THEN
 MODIFICATION ENDS, ALL DEFINED VARIABLE NAMES AND THEIR VALUES
 ARE ALSO ERABED.

```
*C IF THE USER WISHES TO MODIFY THE LINE AGAIN, WE SIMPLY TYPES A NEW *C 'MODIFY' COMMAND. THIS PROCESS IS A LITTLE HARD TO DEMONSTRATE ON THE *C PRINTED PAGE, BUT HERE ARE SOME EXAMPLES:
 #G
#d
  C FOCAL+65 (V3D) 18-401-77
 -1.1 T "THIS IS MY PRORAM",!
  C FOCAL-65 (V3D) 18-JUL-77
  1.18 T "THIS IS MY PRORAM", !
 +05
 THIS IS MY PROMAM
 #H 1.1
  1.10 T HTHIS IS MY PROGRAMM, I
 460
 THIS IS MY PROGRAM
  C FOCA( -65 (V3D) 48-J(H -79
  1.18 T WTHIS IS MY PROGRAMM, I
WHAT THE USER DID, IN THE ABOVE *MODIFY' CONNAND, WAS TO TYPE AN C'ALTMODE', THEN THE CHARACTER 'R', FOGAL THEN TYPED OUT THE LINE UP OF TO THE NEXT 'R' ENGOUNTERED (THE 'R' IN 'PRORAHI), THE USER THEK OF STRUCK THE 'O' KEY, WHICH JUST INSERTED AN 'O' AT THAT POINT, THEN SO STRUCK THE 'LINE FEED' KEY IN ORDER TO RETAIN THE REMAINDER OF THE LINE OF AS IS. THAT REQUIRED 4 KEYSTROKES AS OPPOSED TO 26 REQUIRED TO RE-TYPE
OC THE ENTIRE LINE.
```

```
SOMETIMES IT IS USEFUL FOR THE USER TO SUPPLY DATA VALUES FOR COME OF THE VARIABLES IN THE PROGRAM, RUN THE PROGRAM, THEN THEN COME OF THE VARIABLES IN THE PROGRAM AGAIN, ETC. THE USER CAN INPUT COMERCICAL INFORMATION FROM THE INPUT DEVICE AND HAVE FOCAL STORE THAT COMMANTON IN A VARIABLE NAME, JUST AS IF HE HAD USED THE 'SET' COMMAND OF TO DO IT. THE FOCAL COMMAND WHICH DOES THIS IS THE TASK FOR THE TOWN FOCAL HAITS FOR COMMAND, FOCAL HAITS FOR COMMAND, FOCAL HAITS FOR COMMAND, AND ASSIGNS THAT VALUE AS THE VALUE OF THE VARIABLE NAME.

**C FOCAL WILL TRANSFER CONTROL TO LINE 1.6 IF THE VALUE OF THE EXPRESSION **C IS NOT EQUAL TO ZERO (1.2. LESS THAN OR GREATER THAN), BUT HILL PROCEED OF WITH THE NEXT COMMAND IN SEQUENCE IF THE VALUE IS EQUAL TO ZERO. THE **C '1F' STATEMENT ALLOWS EITHER THO OR THREE WAY BRANCHING OF PROGRAM CONTROL **C DEPENDING UPON THE VALUE OF AN ARITHMETIC EXPRESSION. THIS ALLOWS THE **C COMPUTER PROGRAM TO COMPARE QUANTITIES AND PERFORM DIFFERENT COMMAND **C SEQUENCES, DEPENDING UPON THE RELATIONSHIP OF THOSE QUANTITIES. THUS, **C THE LIFE ADMENDED TO A CONDITIONAL PROCESSION OF THOSE QUANTITIES. THUS,
   *C THE 'IF' COMMAND IS A CONDITIONAL 'GOTO' COMMAND.
THE 'IF' COMMAND IS A CONDITIONAL 'GOTO' COMMAND.

IT IS DESIRABLE TO MAVE FOCAL RENEMBER WHERE IT IS EXECUTING COMMANDS ON

A GIVEN LINE, TRANSFER CONTROL TO, PERHAPS, ANOTHER LINE OR GROUP, THEN

C HAVE FOCAL RETURN TO THE PLACE IT REMEMBERED IT MAS AT. CONTINUING TO

C EXECUTE COMMANDS AS BEFORE. THIS IS A VERY POWERFUL FEATURE, SINCE IT

C ALLOWS THE PROGRAMMER TO WRITE A LINE (OR GROUP OF LINES) TO DO A

C SPECIFIC TASK, AND WHENEVER THAT TASK NEEDS TO BE CONE, PERFORM THE LINE

C OR GRO P, AND RETURN TO THE NEXT COMMAND IN SEQUENCE. THIS CAPABILITY IS

C PROVIDED FOR BY THE 'DO' COMMAND IN FOCAL, THE 'DO' COMMAND CAN BE USED

C TO PERFORM A SINGLE LINE, OF AN ENTIRE GROUP OF LINES, WHEN FUCAL

C ENCOUNTERS A 'DO' COMMAND, IT LOOKS FOR A LINE NUMBER OR A GROUP NUMBER

C C LOUGH AS 13') FOLLOWING THE 'DO' COMMAND, FOCAL THEN REMEMBERS THE POSITION

C D RETIRN TO AFTER PERFORMING THE LINE OR GROUP, TRANSFERS CONTROL TO THE

C RETURNS TO THE NEXT COMMAND IN SEQUENCE FOLLOWING THE 'DO' COMMAND.

C THE 'DO' COMMAND OPERATES SLIGHTLY DIFFERENTLY WHEN PERFORNING CRUT A

C SINGLE LINE OF COMMANDS, THAN IT OOES WHEN PERFORNING AN ENTIRE GROUP

C OF COMMANDS, LET US LOOK AT HOW THE 'DO' CAMMAND FUNCTIONS WHEN HE

C SPECIFY A SPECIFIC LINE NUMBER, THE 'DO' CAMSES FOCAL TO REMEMBER WHERE

C TO RETURN TO AFTER THE 'DO' HAS COMPLETED, TRANSFERS CONTROL TO THE

C FIRST COMMAND ON THE SPECIFIC LINE, THEN PROCEEDS TO EXECUTE COMMANDS

C AS THEY ARE ENCOUNTERED UNTIL A CARRIAGE RETURN IS ENCOUNTERED. AT THE

C TIME THE CARRIAGE RETURN IS ENCOUNTERED, COMMAND RETURNS TO THE PLACE

C FOCAL REMEMBERED WHEN THE 'DO' WAS ENCOUNTERED. SOME EXAMPLES:

THE ABOVE EXAMPLE ASKED FOR THREE VALUES, A BEGINNING ('8'),

OF AN INCREMENT ('1'), AND AND ENDING VALUE ('E'). THE COMMANDS AT LINE

OF 1.2 FORM A LOOP, WHERE THE "TYPE" COMMAND IS EXECUTED, THE

OF INCREMENT IS ADDED TO '8' (AND BECOMES THE NEW VALUE OF '8'), AND THEN '8'

OF INCREMENT IS ADDED TO '8' (AND BECOMES THE NEW VALUE OF '8'), AND THEN '8'

OF THEM CONTROL GETS TRANSPERRED BACK TO LINE 1.2 AND THE TYPET COMMAND IS

OF EXECUTED AGAIN. IF THE VALUE OF '8' IS GREATER THAN 'E', THEN CONTROL

OF PROCEEDS TO THE NEXT STATEMENT IN SEGLENCE, WHICH STOPS THE PROGRAM.

OF THIS TYPE OF LOOP IS OFTEN AEQUIRED IN COMPLET PROGRAMS, SO FOCAL

OF PROVIDES A MORE COMPACT METHOD FOR DOING A LOOP OF THIS TYPE. THE

OF "FOR" COMMAND ALLOWS THE PROGRAMMER TO PERFORM A LOOP IN THIS

OF MANNEW. LET'S FIRST LOOK AT THE ABOVE EXAMPLE. BUT NITH A "FOR" LOOP

OF USED INSTEAD OF THE 'IF' LOOP.
OF THE ABOVE EXAMPLE ASKED FOR THREE VALUES. A BEGINNING ("B").

FOCAL ALLOWS FOR CERTAIN SPECIAL OPERATIONS TO BE PERFORMED WHICH

C THANSCEND NORMAL ARITHMETIC OPERATIONS, THESE OPERATIONS ARE ACCOMPLISHED

C THROUGH THE JSE OF FUNCTIONS. A "FUNCTION" IN FOCAL ALMYS BEGINS

C MITH THE LETTER "F" (MENCE VARIABLE NAMES CANNOT BEGIN MITH THE LETTER;

C AND MAVE A NAME (USJALLY & CHARACTERS) WHICH FOLLOWS THE "F", A "FUNCTION"

C ALSO MAY AN "ARGUMENTY LIST WRIGH IS ENCLOSED IN PARENTHESES FOLLOWING

C THE FUNCTION NAME. SOME FUNCTIONS REQUIRE MORE ARGUMENTS THAN CTHERS,

C DEFENDING UPON THE OPERATION PERFORMED BY THE FUNCTIONS. IF A FUNCTION

C REQUIRES ARGUMENTS, THEN THEY ARE PLACED INSIDE THE PARENTHESES AND

C ARE SEPARATED WITH COMMAS, A FUNCTION TAKES THE ARGUMENTS, PERFORMS

C AS SEPECIFIC OPERATION USING THEM, AND ALL FOCAL FUNCTIONS PETUNA AS THEIR

C VALUE & SINGLE NUMBER. "A FUNCTION MAY APPEAR ANYPLATE IN AN ARITHMETIC CEXPRESSION THAT A NUMBER COULD APPEAR, THE ARGUMENTS TO A FUNCTION CE CAMPLES AND ARITHMETIC EXPRESSION, INCLUDING OTHER FUNCTION VALUES. LET'S

C LOOK AT A FEW SIMPLE POCAL FUNCTIONS FIRST;

THE "FABS" FUNCTION TAKES ONE NUMBERIC ARGUMENT AND THE VALUE IT

GRETURNS IS THE ABSOLUTE VALUE OF THE ARGUMENT, EXAMPLES;

THE "FABS" FUNCTION TAKES ONE NUMBERIC ARGUMENT, EXAMPLES;

FABS(-3).!

3.688

T THE ABSOLUTE VALUE OF THE ARGUMENT, EXAMPLES;

FABS(-3).!

5.608
```

```
THE 'FINT' FUNCTION TAKES ONE NUMERIC ARGUMENT AND THE VALUE IT AC RETURNS IS THE 'GREATEST (NTEGER LESS THAN THE NUMBER'. THUS, THE RC VALUE RETURNED WILL HAVE NO FRACTIONAL PART, THIS PUNCTION DOES NO ROUNDING (SEE 'FINR' BELOW) ON THE ARGUMENT, EXAMPLES:
*T FINT(8.75).1
       3.000
*T FINT(3.99) .1
       3.000
eT FINT(=3.14).1

FOCAL HAS MORE POWERFUL FACILITIES FOR THE MANIPULATION OF CHARACTERS OF MHICH IS EXPLAINED IN DETAIL LATER. THE "FOUT" AND "FOUR" FUNCTIONS OF ALLOH THE PROGRAMMER TO GET BY THOSE SEEMINGLY IMPOSSIBLE QUESTIONS OF SUCH AS THOSE CAN I INPUT/OUTPUT THIS STRANGE CHARACTERIA.
```

```
FOCAL HAS THE ABILITY TO TRANSFER INFORMATION TO, AND OBTAIN INFOR-
C MATION PROM, VARIOUS DEVICES THAT THE USER MAY MAVE ATTACHED TO HIS
C COMPUTER SYSTEM. THE VARIOUS HARDWARE DEVICES ARE ASSIGNED NUMBERS BY
C THE FOCAL SYSTEM, THESE ARE POSITIVE NUMBERS IN THE RANGE OF $-127.
C THE PROGRAMMER MAY INDEPENDENTLY CHANGE WHICH DEVICE FOCAL
C IS INPITTING FROM OR OUTPUTTING TO AT ANY GIVEN INSTANT, THROUGH THE
C JSE OF THE "FLOY" AND "FODY" FUNCTIONS. THE "FLOY" FUNCTION STORES
C THE SINGLE NUMBER OF THE CURRENT INPUT DEVICE, THEA TAKES
C THE SINGLE NUMBERIC ARGUMENT AS THE DEVICE UMBER OF THE DEVICE TO MAKE
C THE CURRENTLY ACTIVE INPUT DEVICE. THE "FODY" PUNCTION STORES AWAY
C THE CURRENT DEVICE NUMBER OF THE GURRENT OUTPUT DEVICE, THEN TAKES THE
C SINGLE RUMERIC ARGUMENT AS THE DEVICE NUMBER OF THE DEVICE TO MAKE THE
C CURRENTLY ACTIVE DUTPUT DEVICE. FURTHER IMPUT/OUTPUT MILL TAKE
C CHECK'SING THE NEW DEVICES UNTIL EITHER A DIFFERENT DEVICE
C IS MADE CURRENT THROUGH A NEW CALL TO "FIDY"/"FODY" OR A "RESTORE INPUT"
C (ADBREVIATED "R 1") OR "RESTORE OUTPUT" TABBREVIATED "R 0") COMPAND IS
C EXECUTED, HNICH RESTORES THE INPUT/OUTPUT DEVICE BACK TO HHAI IT MAS
C JUST PRIOR TO THE LAST "FIBU"/"FODY". IN THE FOLLOWING EXAMPLES, ASSUME
C THAT THE CURRENT INPUT DEVICE IS DEVICE NUMBER 3, AND THE CURRENT CUTPUT.
   .C DEVICE IS DEVICE NUMBER 3.

THIS IS HEAVY STUFF, FOCAL (SINCE IT IS A PURE INTERPRETER) EDESN'T CCATE WHERE IT GETS COMMANDS FROM. AS LONG AS THEY ARE A SERIES OF CCHARACTERS. THUS FOCAL CAN READ COMMANDS FROM HARDWARE DEVICES, STRINGS, OR WHATEVER, FOCAL IS ALSO VERY COMPACT, FOCAL CAN BE TOLD A LOT IN CA VERY LITTLE SPACE. I DIGRESS SLIGHTLY TO PRESENT A SMORT PROGRAM OF WHICH WILL INPUT A NUMBER FROM THE KEYBOARD, AND OUTPUT IT'S STARY OF REPRESENTATION. THIS PROGRAM JSES A PROGRAMMING TECHNIQUE CALLED OF SPECURSION! FEGGAL IS PULLY RECURSIVE!. PUTTING ON THE WITARD SATE
 "C 'RECURSION' (FOCAL IN FULLY RECURSIVE). PUTTING ON THE WIZARD HATT

```

```
SOMETIMES IT IS USEFUL FOR THE PROGRAMMER TO DEFINE HIS OWN OC LINE OR GROUP AS A FUNCTION, THEN MENEVER HE MANTS THAT CHART FUNCTION INVOKED, HE USES THE "FSBR" FUNCTION OF THE FOCAL COMMAND LINE OR GROUP, ONE NUMERIC ARGUMENT OF CAN BE PASSED TO THE ROUTINE AND THE ROUTINE CAN RETURN A SINGLE NUMERIC OF VALUE FOR THE VALUE OF THE IFBRE FUNCTION. THE ARGUMENT IS PASSED IN
**C VALUE FOR THE VALUE OF THE IFSORY FUNCTION. THE ARGUMENT IS PASSED IN

**C A PARAMETER INDEPENDENT FASHION (HEAVY COMPUTER SCIENCE JARGON).

***C THERE ARE ACTUALLY TWO ARGUMENTS TO THE "FSORY FUNCTION. THE FIRST

***C IS A LINE NUMBER OR GROUP NUMBER OF THE LINE OR GROUP TO 'DO' AS

***C THE FUNCTION (YES, AN ARITHMETIC EXPRESSION CAN BE MERE), THE SECOND

***C IS THE NUMBERIC ARGUMENT TO BE PASSED TO THE FUNCTION. THE

***C PRECISE SEQUENCE IS AS FOLLOWS. THE CORRENT VALUE OF THE VARIABLE TATE

****C IS PUSHED ON THE STACK, THE VARIABLE '4' IS SET EQUAL TO THE NUMBERIC

***C ARGUMENT PASSED TO THE PUNCTION (SECOND ARG OF FFSBR'), A 'DO' IS PERFORMED

***C OF THE SPECIFIED LINE OR GROUP (THE FIRST ARG OF FFSBR'), WHEN THE 'DO'

***C RETURNS. THE VALUE RETURNED BY THE FUNCTION IS THE CURRENT VALUE OF 'A',

***C AND THE OLD VALUE OF '8' IS RESTORED FROM THE STACK, VARIABLE AAMES CAN

***C BEGIN WITH THE CHARACTER TA', HENCE '48'-*87' MAY BE USED AS VALID

***C VARIABLE NAMES IN FOCAL PROGRAMS. HOWEVER, BY CONVENTION, A FOCAL PROGRAMM

***C SHOULD ONLY USE 'A' VARIABLES IN A USER-DEFINED FUNCTION IN ORDER TO

***C BECABLE TO WRITE USER DEFINED FUNCTIONS WHICH ARE INDEPENDENT OF CALLING

***C ROLTINE. SOME EXAMPLES**

APPENDIX C

I WILL NOW GIVE SOME USEFUL INFORMATION FOR THOSE PEOPLE NHC HAVE AN ASSEMBLY LISTING OF FOCAL AND NANT TO MACK THINGS INTO []. THESE TIPS ARE BY NO MEANS EXHAUSTIVE, BUT COVER THE MORE COMMON THINGS.

THERE IS A LOCATION ON PAGE RERO LABELED "DELSPL" WHICH FOCAL LOOKS AT TO DETERMINE HOW IT SMOULD HANDLE RUBOUT PROCESSING ON THE CONSCLE DEVICE. STORE A BERO THERE IF YOU HAVE A DEVICE HHICH IS NOT A CRT (SUCH AS A TELETYPE, DECHRITER, ETG!). IF YOU HAVE A CRT WHICH WILL BACKSPACE THE CURSOR HHEN SENT A "BACKSPACE" CHARACTER (ASCII CODE 18 OCTAL), THEN STORE ANY NON-BERO VALUE IN 'DELSPL' TO ENABLE FANCY CRT MODE RUBOUTS, WHERE FOCAL "EATS" THE CHARACTER OFF THE SCREEN BY SENDING THE CONSOLE THE SEGUENCE OF CHARACTERS, "BACKSPACE", "SPACE", "BACKSPACE".

THE EVENT SYTE FOR THE SOFTHARE PRIORITY INTERRUPT SYSTEM IS THE BYTE STORED AT THE LABEL "EVMASK". ANY INTERRUPT ROUTINE CAN SET BITS IN THIS BYTE TO CORRESPOND TO A FOCAL EVENT. (THE LSB 15 EVENT 1. THE MSB 19 EVENT 81

THE TRO DISPATCH VECTORS HUST BE SET TO POINT TO THE ADDRESS 'INTSRY' SO THAT FOCAL ERROR MESSAGES (WHICH USE THE 'BRK' INSTRUCTION) CAN BE FIELDED PROPERLY. ONE EASY WAY TO GO THIS IS JUST PUT THE CODE TO SET THEM IN THE CONSOLE DEVICE INITIALIZATION ROUTINE, WHICH FOCAL CALLS THE VERY FIRST THING WHEN IT STARTS (SEE CODE AT THE LABEL 'FOCAL').

TO ADD 1-0 DEVICES TO FOCAL, MRITE AN ASSEMBLY LANGUAGE DRIVER ROUTINE MIGH KNOWS HOW TO TALK TO THE DEVICE. THE ROUTINE MUST HAVE ENTRY POINTS TO INITIALIZE THE DEVICE FOR INPUT (IF AN INPUT DEVICE) AND INITIALIZE THE DEVICE FOR GUYPUT (IF AN OUTPUT DEVICE). THE ROUTINE MUST ALSO HAVE ENTRY POINTS TO CLOSE THE DEVICE. IF THE DEVICE IS AN INPUT DEVICE, THERE MUST BE AN ENTRY POINT WHERE FOCAL CAN CALL THE DRIVER IN ORDER TO INPUT AN ASCII CHARACTER FROM THE DEVICE. FOCAL WILL CALL THE ROUTINE MITM A 'JSN' INSTRUCTION, THE ROUTINE WILL RETURN (VIA 'RTS') HITH THE DATA BYTE IN THE ACCUMULATOR, THE 'G' BIT MUST BE CLEAR IF NO ERRORS WERE ENCOUNTERD ON INPUT, IF THE 'C' BIT IS SET UPON RETURN FROM THE ROUTINE, (SEE CODE AT 'READC' IN FOCAL'). IF THE DEVICE IS AN OUTPUT DEVICE, THEN CHERE MUST BE AN ENTRY POINT HHICH FOCAL WILL CALL WITH THE DATA BYTE TO BE OUTPUT IN THE ACCUMULATOR REGISTER. THE ROUTINE WILL BE CALLED WITH A 'JSR' INSTRUCTION AND WILL RETURN (VIA 'RTS') HITH THE 'G' BIT CLEAR IF NO ERRORS MERE ENCOUNTERED, AND THE 'C' BIT SET IF AN ERROR OCCURRED. THE ADDRESSES OF THESE ENTRY POINTS ARE PLACED IN THE DEVICE DISPATCH TABLES (SEE LABEL 'IDSPH'). THE MELTINE (VIA 'RTS') HITH THE 'G' BIT CLEAR IF NO ERRORS MERE ENCOUNTERED, AND THE 'C' BIT SET IF AN ERROR OCCURRED. THE OLD OF THAT DEVICE, IF MORE THAN FIVE DEVICES ARE INSERTED, THE VALUES OF 'IDSPH'). THE MELTINE OF THAN FIVE DEVICES ARE INSERTED, THE VALUES OF 'IDSPH', AND 'OBEN' MUST OF UPDATED. THE ONLY PLACE THEY ARE REFERENCED IS AT 'CHKODY' AND ICHKIDY'.

THE INITIAL DEVICE NUMBER OF THE CONSOLE DEVICE IS STORED IN THE LDCATION 'CONDEY', BIORE & DIFFERENT NUMBER THERE IF YOU HANT YOUR CONSOLE DEVICE TO BE SOMETHING OTHER THAN DEVICE NUMBER Ø. THIS ONLY MATTERS WHEN FOCAL FIRST STARTS UP, SINCE YOU CAN CHANGE TO ANOTHER DEVICE WITH THE 'FCON' FUNCTION.

ADDITIONAL COMMANDS MAY BE ADDED TO FOCAL BY PLACING THE FIRST CHARACTER OF THE COMMAND (MUST BE DIFFERENT FROM EXISTING COMMANDS) IN COMMAND: TABLE (THERE IS SPACE FOR MACKERS), AND THE ADDRESS OF THE ROUTINE TO PROCESS THE COMMAND IN THE "COMMAND" AND "COMMAND! TABLES. LOOK AT THE CODE AT "PROC!" TO SEE HON FOCAL DISPATCHES TO COMMANDS.

NEW ASSEMBLY LANGUAGE FUNCTIONS MAY BE ADDED TO FOCAL BY ENCODING THE FUNCTION NAME (USUALLY 3 CHARACTERS) INTO ITS 'HASH' CODE (SEE CODE AT 'EFUN' TO DETERMINE HOW HASH CODE IS GENERATED) AND STORING THE HASH CODE IN THE FUNCTION IS INSERTED INTO THE FUNCTION IS INSERTED INTO THE "FUNCH AND "FUNDL" TABLES, LOOK AT THE CODE AT 'FUNC', AND ANY OF THE STANDARD FOCAL FUNCTIONS TO SEE HOW THE ROUTINE IS CALLED. NOTE: THE FIRST ARGUMENT OF A FUNCTION IS ALREADY EVALUATED FOR YOU AND IT'S VALUE IS STORED IN THE FLOATING POINT ACCUMULATOR, LOCATED ON PAGE BERD AS 'FACI', IF YOUR FUNCTION IS TO RETURN A VALUE, IT SHOULD STORE A NORMALISED FLOATING FOINT NUMBER IN 'FACI', PRIOR TO RETURNING (BY JUMPING TO 'FPOPI',

HEED CAREFULLY THE HARNING PRINTED ABOVE SUBROUTINE 'PUSHJ'.

THE RANDOM NUMBER SEED GETS INITIALIZED TO RANDOMNESS BY LEADING THE SYTE FROM PAGE ZERO LOCATION "MASH". SOME ROUTINE (GENERALLY NEYBOARD INPUT ROUTINE) ON YOUR SYSTEM NEEDS TO OCCASIONALLY STORE JUNK IN THAT LOCATION (SEE "FRAN"). USUALLY THE KEYBOARD INPUT ROUTINE INCREMENTS LOCATION "MASH" AS IT'S MAITING FOR THE USER TO STRIKE A KEY ON THE KEYBOARD. THUS THE VALUE WILL BE ESSENTIALLY RANDOM.

SOME KEYBOARDS SEND DIFFERENT CODES FOR THE "ESCAPET AND/OR ALTHODE KEYS. FOCAL NORMALLY LOOKS FOR OCTAL CODE 3% AS THE SEARCH OPTION IN THE THODIFY COMMAND. IF YOU HAVE A STRANGE KEYBOARD, YOU CAN PATCH THE VALUE AT "MMXTC" + A FEW TO HMATEVER ASCIT CODE YOU WANT IT TO BE.

IF YOU HAVE A LOCAL COPY DEVICE FOR A CONSCLE (SUMETIMES, INCORRECTLY, CALLED MALE DUPLEX), THE CORRECT MAY TO MANDLE THIS IS IN YOUR DEVICE SERVICE HOUTINE, BUT A BUTCK MACK IS TO THOP THE "JSR PRINTC" LOCATED AT TREADER & ONE INSTRUCTION.

IF YOU IMPLEMENT A CURSOR ADDRESSING ROUTINE FOR YOUR CRT CONSOLE DEVICE, PLACE THE ADDRESS OF THAT ROUTINE AS THE ADDRESS OF THE JSR CONCUR! IN THE 'FCUR' FUNCTION (SEE LABEL 'FCUR').
